

# Dentist portal

## Overview

Most of the time, dentistry students have a common problem when they are asked to bring patients for treatment, this is always the hard part, like where would I find someone? They may fail the subject since it is not always easy to find a patient with the condition they need. During their practice, students tend to buy some supplies and materials and some of them won't be used then so they just get rid of them. Some dentists tend to find fresh graduates or even undergraduates to work for their clinics as trainees. At least you have once paid a visit to a dentist, was it always that easy to find one nearby? Did you know if he's a professional or good at what you need?

## Objective

The main idea of the project is to have a platform where we can solve all the problems mentioned. Students will be able to find the cases they need easily. Students will no longer waste their supplies. It would be easier for dentists to find trainees. We will be able to make appointments with trusted dentists easily.

## Proposed features

User must create account to access full-site features

### **1. For student**

- Student can search for the case he needs and get in contact with the patient to make an appointment.

- Student can buy, sell or even share his unused supplies with other students.
- Student can apply for an internship

## **2. For patient**

- Patient can search for a dentist and make an appointment with him based on other patients' reviews.
- Patient can make an appointment with a student to get treatment for free.

## **3. For dentist**

- Dentists can search for trainees and get them hired at their clinics.
